

Ballot Design Principles

1. Slates listed before non-slate candidates
2. Slates with more members listed before slates with fewer members
3. Where slates have equal numbers, slate headed by incumbent listed ahead of slate headed by non-incumbent
4. Where slates have equal numbers, slate headed by incumbent running for different office listed ahead of slate headed by non-incumbent
5. Where slates have equal numbers and neither is headed by incumbent, select ballot position by coin toss, alphabetical order of last name of top candidate, or some other neutral process determined by the Election Committee.
